Assignment 3

Francisco Beltran

Intro

This is the third assignment for HIST2025. Here, we are going to explore information from the 1860 Population Census of the province of Zaragoza (Spain).

We first load the necessary packages and import the data.

```
rm(list=ls())
library(tidyverse)
data <- read_csv("data-assign/zgz-1860/sample-zgz-1860.csv")
```

We can now start exploring the data. Let's see how it is structured.

```
data
```

```
# A tibble: 132,500 x 25
   settlement munic  household hous_size indiv name     surname1  surname2 sex
   <chr>      <chr>  <chr>         <dbl> <dbl> <chr>    <chr>     <chr>    <chr>
 1 ALAGON     ALAGON 1                 5     5 FELIPE   ARNAL     PUERTOL~ Male
 2 ALAGON     ALAGON 1                 5     4 MARIA    DUESA     ROMAN    Fema~
 3 ALAGON     ALAGON 1                 5     3 HIPOLITO ROMAN     PUERTOL~ Male
 4 ALAGON     ALAGON 1                 5     1 HIPOLITO ROMAN     -        Male
 5 ALAGON     ALAGON 1                 5     2 ANTONIA  PUERTOLAS -        Fema~
 6 ALAGON     ALAGON 2                 4     3 MATEO    GONZALEZ  VILLANU~ Male
 7 ALAGON     ALAGON 2                 4     4 FERNANDA GONZALEZ  VILLANU~ Fema~
 8 ALAGON     ALAGON 2                 4     1 MATEO    GONZALEZ  TIZNA    Male
 9 ALAGON     ALAGON 2                 4     2 MANUELA  VILLANUE~ PARDO    Fema~
10 ALAGON     ALAGON 3                 3     3 LUISA    BARBO     BENITO   Fema~
# i 132,490 more rows
# i 16 more variables: age <dbl>, marst <chr>, ses <chr>, POS <chr>,
#   RELACION <chr>, occ <chr>, write <chr>, read <chr>, school <dbl>,
```

```
#   fam_id <chr>, parity <dbl>, father <dbl>, mother <dbl>, munic_gis <chr>,
#   geometry <chr>, d_zgz <dbl>
```

Now, I am interested in knowing how many men and women we have in the source.

```
data |>
  count(sex)
```

```
# A tibble: 3 x 2
  sex        n
  <chr>  <int>
1 Female 64050
2 Male   68449
3 <NA>       1
```

You can add options to executable code like this

```
[1] 4
```

The `echo: false` option disables the printing of code (only output is displayed).
